

CLEAR GUIDANCE. CONSISTENT RESPONSE. COMMUNITY-READY SUPPORT.

*A free digital tool to support frontline workers responding to
overdose, mental health, and substance use concerns*

Built for Real-World Conditions

When someone says:

- “I’m worried about someone.”
- “I think something’s wrong.”

You need **fast, reliable, shared guidance** – in the moment.
React supports **frontline decision-making** under pressure.

How React Supports Your Work

- ✓ Identify **signs of opioid poisoning**
- ✓ **Call 911 directly** without switching tools
- ✓ Follow **step-by-step emergency response guidance**
- ✓ Support **naloxone administration**
- ✓ Connect people to local **services and supports**
- ✓ Provide information in **multiple languages**

Why Frontline Teams Use React

- Reduces hesitation in high-stress situations
- Supports consistent responses across staff and volunteers
- Builds confidence for new or non-clinical workers
- Bridges crisis response and ongoing care
- Complements – not replaces – professional judgment

A Tool for Collective Care

React is designed to strengthen community response – not place the burden on individuals. Prepared teams save lives.
